Keep the flower. Lose the leaves.

Softrim: Craft Quality At Scale

When cannabis perfection matters, Softrim Craft delivers. Built for craft growers who require gold-standard quality, the Softrim Craft brings the precision of modern manufacturing to the trim room at an accessible entry price. Its secret is simple: uniform, pre-sorted input material, combined with gentle silicone trimming technology, produces luxury-grade flower at scale.

With Sort & Set, the Craft transforms from sorter to trimmer in seconds. Sort your flower by size, set the matching bud size and get a clean, consistent trim that protects the shape, structure and trichomes that define premium flower.

Flex Flow Throughput scales with your staffing and workflow, so you choose the balance between batch size and labor. Run small batches with a single operator and add a second operator for larger batches or faster throughput needs.

Your customers expect hand-trimmed quality. With Softrim Craft, you can deliver the same hand trim quality at a fraction of the cost.

SOFTRIM CRAFT

A SORT & SET FLEXFLOW MACHINE

WHY SILICONE?

- Increased flower yield for increased profit
- Natural flower formations are intact
- Preserve trichomes to reserve THC levels and aromas

ROBOTIC SERVO CONTROLS

- On-the-fly micro adjustments
- Store your settings
- 4-way process parameters

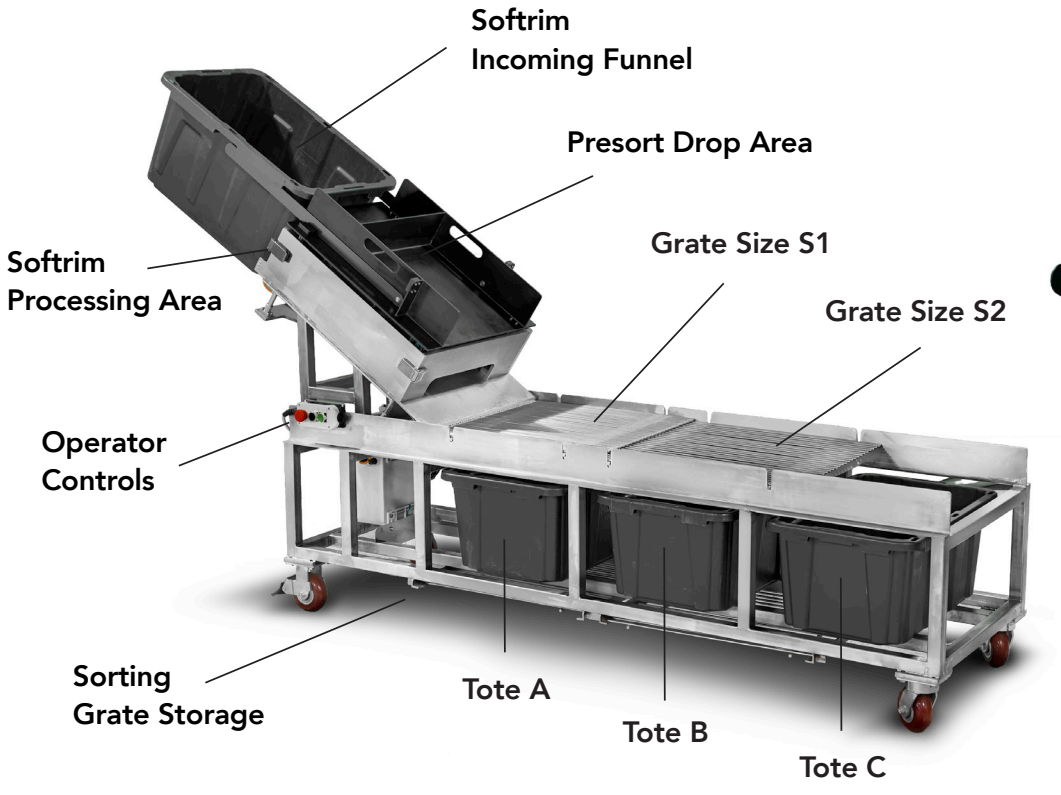

Dimensions	7.8′ x 28″ x 4.3′
Utilities	120v 5 amps 50/60 hz
Weight	800 pounds
FlexFlow throughput	60-100 lbs / 8 hour shift
Sorting grates	Presort 15 mm, 24 mm; processed flower sort 4 mm, 12 mm
Machine flower set size	Smalls, medium, large, extra large
Noise level	Normal conversation can be had
Manufacture method	Single piece flow
Placement of Softrim	In the dry room
EU GMP ready materials	Food grade silicone, 304 stainless, hardened aluminum
Safety sensors	Maintenance door, e-stop
Motor	Servo
Power cable	20 foot
Warranty	1 year
Design engineering	Hygienic design
Silicone finger belts	Lifespan approx 4K to 5K pounds
Machine hardware available	EU GMP, CE, CSA

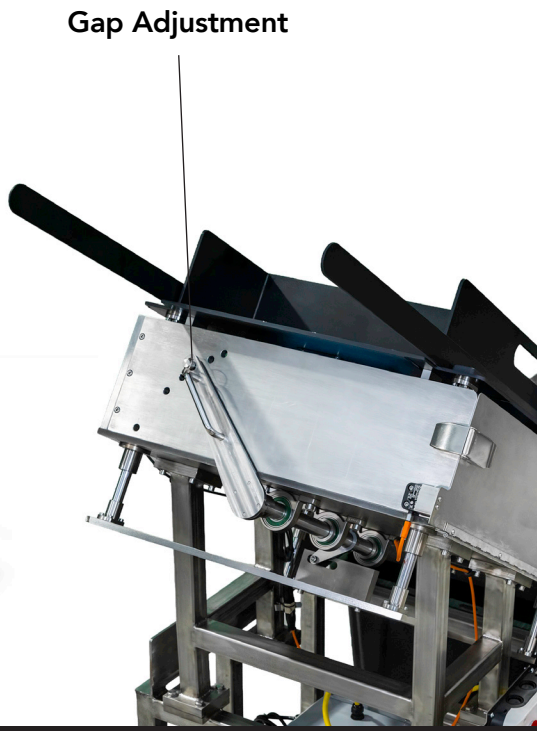

Operating Style	Operators	Pre-Sort	Throughput per 8-Hour Shift
One operator, pre-sort and post-sort	1	Yes	Est 60 lb
Two operators, pre-sort and post-sort	2	Yes	Est 80 lb
Two operators, post-sort, no pre-sort	2	No	Est 100 lb

	Tote A	Tote B	Tote C
Presort	≤ 15 mm	15–24 mm	≥ 24 mm
Finished	Trim	4-12mm	≥ 12 mm

	Grate Size S1	Grate Size S2
Presort	≤ 15 mm	15–24 mm
Finished	Trim	4-12mm
